

WE'RE HIRING

Data Analyst Intern

UCLA CENTER FOR HEALTH POLICY RESEARCH
www.healthpolicy.ucla.edu

BUILDING KNOWLEDGE
INFORMING POLICY
IMPROVING HEALTH 

Our Mission

Our vision is a health policy process driven by credible and comprehensive evidence. We also believe data should be democratized and put into the hands of the public in ways that inform, educate, effect change. Ultimately, we aim to develop crucial evidence to support the elimination of persistent disparities in health and health coverage.

Job Description

The Health Economics and Evaluation Research (HEER) Program analyzes many different data sources including medical claims, patient discharge data, state and national survey, among others. The results are used to evaluate the economic and financial impacts of national, state and local-level health care interventions. The HEER Program aims to increase understanding of the costs and benefits of health care interventions, as well as suggest ways to make programs and policies more effective.

This Data Analyst Intern will provide assistance in processing the data, producing descriptive tables, and automating data processing flow for HEER.
